

The Envelope division of Fuller Group, Inc., located in Greenville, SC, is in search of a Civil/Structural Engineer with interest in building envelope and structural investigation, litigation support, repair and design consulting.

Description of Responsibilities

- Perform forensic evaluations for residential and commercial facilities and other structures
- Perform structural engineering analysis of existing buildings
- Serve as expert witness and provide construction litigation support
- Develop proposals for engineering services
- Design repairs and assist in construction administration
- Interface with existing and potential clients, including cultivating and maintaining relationships

Position Requirements

Candidate must be a licensed professional engineer with at least 4 years of work experience.

Qualified candidates will possess exceptional written and verbal communication skills. Experience interpreting and applying building code requirements is essential, and candidates will have a willingness to conduct complex research in order to solve problems.

Some travel will be required.

About Fuller Group, Inc.

Among other things, Fuller Group offers competitive salaries and benefits, including paid vacation and sick time, medical, dental, and vision insurance, a Simple IRA plan, and professional development opportunities.

Fuller Group specializes in structural engineering, building envelope design, and forensics. As expert consultants in the building industry, we focus on designing buildings that are safe, resilient and enduring. Our innovative professionals provide solutions to support repairs, new construction projects, and construction litigation cases.
