Speaker Bio

Jason Boyd – Jason has been with Thomas Concrete for five years, serving as the technical service manager for the upstate of South Carolina. He is ACI and DOT certified and assists with proctoring the ACI examination across the Carolinas. Jason is a certified batch inspector in both North and South Carolina. He is a crucial part of the team when it comes to implementing and testing mix designs and quality control.

John Cook – John is the Director of Technical Services for the Thomas Concrete Georgia Division but is an instrumental player across all Thomas divisions. He has been with Thomas Concrete for 36 years. John serves on the Thomas design team and aids in the creation of all new mix designs. He is ACI and DOT certified and assists with writing the ACI manual and ASTM publications. It is safe to say that John is an expert on concrete.

Whitney Dixon – Whitney is a 2015 graduate of Clemson University and is currently pursuing a Master of Science in Project Management at Liberty University. During her time at Clemson, she worked with Clemson Engineers for Developing Countries. She has a career background in supply chain, logistics, and account management across the manufacturing and construction industry. She has been with Thomas Concrete for about a year and a half as the Sales Coordinator for the upstate of South Carolina, assisting with internal project management, data analysis, and inside/large scale commercial sales.

PDH's for this presentation will be provided electronically for members.

Announcements

1. **We Want to Hear from You** – If you have suggestions for meeting topics or speakers, please share your ideas with your SEA officers. Are there webinars or recorded sessions from NCSEA, AISC, ACI, or other organizations you have been wanting to see but can't find the time? Would using one of our quarterly meetings to view these webinars be of interest? Let us know. This is your chapter, and we strive to find content that will benefit area Structural Engineers.
